PRODUCT HIGHLIGHTS

Small Footprint

Powerful 160kV Generator

High Image Resolution with 24-Bit Color

Enhanced Material Discrimination

Windows Operating System with Intel® Core™ Processor

The XIS-5335S™ is a compact but powerful X-Ray Inspection System (XIS) that provides more power than any system in its cabinet size. Capable of fitting through standard doorways, the system's small footprint allows for easy relocation and installation, while the 160kV generator provides improved detection in small objects, such as bags, backpacks, and mail parcels.

Combined with Astrophysics' best-in-class software, the XIS-5335S helps operators quickly identify threats using 6-color material discrimination and high-contrast filters that provide alternative perspectives on scanned objects. Superior image quality ensures higher throughput, making the XIS-5335S the ideal space-saving solution for sites that require powerful protection against weapons, narcotics, and contraband.

The Astrophysics XIS-5335S is designed and assembled in the United States to the highest quality standards. For nearly twenty years, Astrophysics has led the industry in research and development, creating integrated solutions to advance the critical security missions of our customers and partners.
